"Welcome to the latest edition of insider"

Could your customers benefit from a more intelligent approach to workforce management?

At timeware®, we work alongside our partners and their customers to deliver workforce management solutions designed around the way each organisation operates.

From complex shift arrangements and overtime authorisation to leave management, accurate attendance recording and comprehensive reporting, timeware® HRMS provides the flexibility and functionality that modern businesses demand.

Our experienced team is here to help you identify opportunities, understand customer requirements and deliver the right solution.

timeware® HRMS
Human Resource Management System

One comprehensive platform for modern workforce management.

timeware® HRMS brings together HR, time management, leave management and overtime authorisation within a powerful, cloud-based solution.

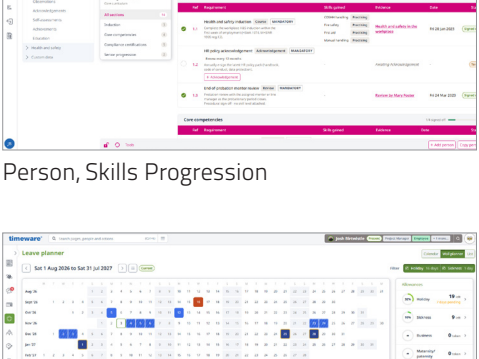

Dashboard updates in real-time

Designed to simplify everyday workforce administration, the software provides organisations with accurate information, greater operational visibility and the flexibility to accommodate complex working arrangements.

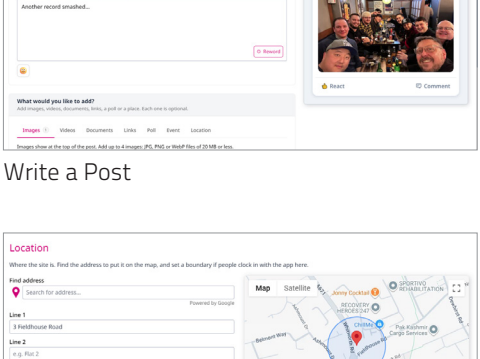

Integration with established security technologies, including Suprema and Paxton, allows access control events to be used as employee attendance records, reducing duplication and improving accuracy.

Whether your customers need to manage employee working hours, simplify holiday administration, monitor attendance or process complex overtime calculations, timeware® HRMS delivers the functionality they need.

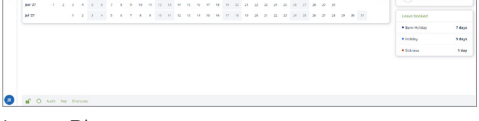

Every implementation is supported by our experienced UK-based team, providing customers with professional guidance, comprehensive training and dependable ongoing support.

Become a Referral Partner

Introduce your customers to timeware® HRMS and benefit from every successful referral.

Many organisations are reviewing how they manage their workforce, looking for cloud-based solutions that bring HR, time management, leave management and attendance together.

Referral Partner Programme

For customers already using biometric clocking equipment or access control systems, timeware® HRMS offers an excellent opportunity to extend their existing investment through integrated workforce management.

As a timeware® referral partner, you can introduce these opportunities to our team with confidence.

We take care of understanding the customer's requirements, demonstrating the software, managing implementation and delivering ongoing support.

Our Referral Partner Programme rewards successful introductions with a 15% referral fee.

Whether your customer operates from a single location or manages employees across multiple sites, we can help establish whether timeware® HRMS is the right solution.

Contact us to discuss potential opportunities or arrange a personalised demonstration for your customer.

timeware® integrations include:

timeware® HRMS works with a wide range of established access control, biometric, payroll and HR technologies, helping organisations connect their existing systems and improve the flow of workforce information.

Suprema BioStar 2 · Paxton Net2 · sensor ACCESS TECHNOLOGY GUARDPOINT 10 · Genetec · access PeopleHR · ADP · IRIS · sage · pegasus · HiBob · bambooHR · INVENTRY SIGN IN SOLUTIONS

Have a customer enquiry? Let's talk.

If you're speaking with a customer who wants to improve HR administration, attendance recording or workforce management, I'm here to help.

Whether you need technical advice, integration information or a demonstration of timeware® HRMS, we can work together to identify the most suitable approach.
