

Time to take control...

timeware® Professional

timeware® time and attendance software comprises of a suite of modules hosted in the Aggregate Industries application server, designed to record, and report staff time keeping.

Personnel

Connect staff to pre-configured work patterns so timeware® can tell you that your team is at work, on time, and that minimum staffing levels have been met.

Attendance

The attendance module contains an extremely customisable time and attendance engine that supports many work pattern methodologies including standard, flexitime, continental shift and annualised hours. This module can also integrate with the timeware® ESS GO mobile app.

Absence management

Authorised and unauthorised leave can be tracked through the absence management module which can highlight trends.

Dashboards and reports

Quickly view or schedule emails to send managers timeware® data in .PDF or Excel format.

Multiple customisations points throughout timeware® enable the software to provide a unique time and attendance solution for all Aggregate Industry locations across the UK.

Integration and Customisation

timeware® has two unique selling points, its ability to integrate with other applications and its extensive customisation potential.

Integration

timeware's primary USP is its ability to integrate with other applications, for example a Payroll, HR or security system. timeware® or the third party software becomes the 'primary' system passing data to the 'secondary'. A well planned integration enables a business to improve workflow and increase efficiency.

Customisation

timeware's secondary USP is its extensive customisation potential. Over 95% of businesses using timeware® software have implemented at least one unique customisation project. This means that the majority of timeware® customers benefit from a unique business tool that provides a maximum return on their product investment.

Attendance devices

The most comprehensive employee attendance module deserves the best attendance device, so we've integrated our software with products from two world-class manufacturers, Suprema Inc. and Paxton.

Aggregate Industries have the option of implementing a solution that utilises timeware® fobs, Paxton fobs, fingerprint, and face recognition. We can also offer a solution that allows staff to make a booking via mobile phone, using ESS GO, at a timeware® Puck.
