timelines

SUPPLEMENT

"Welcome to the November timelines supplement."

"This month, we've brought together three short videos to keep you informed about developments across the timeware® range. Explore timeware® Professional 2027, take a closer look at our cloud platform, timeware® HRMS, and discover how the timeware® Employee App gives employees convenient access to work information and everyday tasks from their phone.

Whether you're continuing with Professional or considering a move to HRMS, these videos offer a useful starting point. Our team is here to answer your questions."

Karl Briggs Customer Liaison Officer

timeware® Professional 2027 summary

Take a closer look at timeware® Professional 2027 with our video summary. Designed for existing customers, it introduces the 2027 release and helps you prepare for conversations about your next upgrade. If you would like to discuss your current system or upgrade arrangements, our team is ready to help.

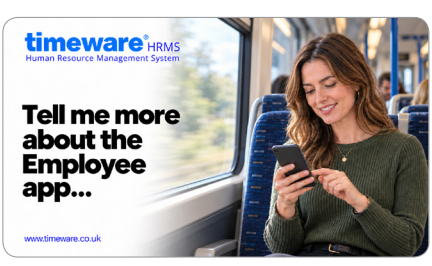

Tell me more about timeware® HRMS

Bring HR, leave, time management and reporting together in one cloud platform. This video introduces timeware® HRMS and shows how connected information helps managers make informed decisions while reducing everyday administration. From employee records and document management to timesheets, dashboards and self-service, discover a more joined-up approach to managing your workforce, with software designed, hosted and supported in the UK.

Tell me more about the timeware® Employee app

Put everyday work information within easy reach. The timeware® HRMS Employee app lets employees clock in and out, request leave, check balances, view shifts and timesheets, access training and company documents, and submit mileage claims from their phone. Employers control which features are available to each employee through configurable app policies.
